Claim Rejections - 35 USC, 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,4,10-14,18,19,21,28-31,34,36-39,41-45,47,51 are rejected under 35

U.S.C. 103(a) as being unpatentable over Takeuchi et al EP 0747355.

Takeuchi et al teach carbamate compounds corresponding to the formula of recited claim 1. See, for example, page 47 example 21 where, with respect to applicants' recited formula, R² is phenyl, K is a bond, R¹ is hydrogen, B'' is Oxygen, ring B is piperidine, X is methylene, and R⁴⁶ and R⁴⁷ are methyl.

One of ordinary skill in the art would be motivated to prepare compounds structurally similar to those recited by applicants' in the expectation of obtaining useful compounds having muscarinic receptor antagonizing properties as compounds structurally similar in structure are expected to have similar properties. The level of skill in the art is further reflected in In re Lohr 137 USPQ 548 at 549 (CCPA 1963), and in In re Payne 204 USPQ 249 at 254 (CCPA 1979).

No claim is allowed.
